

FACTS ABOUT THE FROG

FACTS ABOUT THE FROG

There are over 5,000 species of frog.

Frogs don't need to drink water as they absorb it through their skin.

When a frog swallows its prey, it blinks, which pushes its eyeballs down on top of the mouth to help push the food down its throat.

Some frogs can jump over 20 times their own body length.

A frog's call is unique to its species, and some frog calls can be heard up to a mile away.

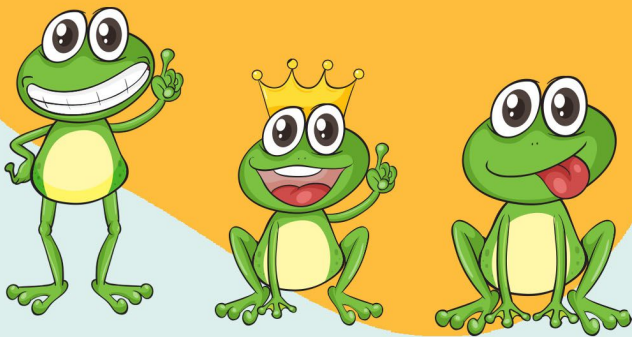

Most frogs have teeth, although usually only on their upper jaw.

A frog's eyes and nose are on the very top of their heads

A group of frogs is called an army. Maybe it's because they wear army green camouflage!

Not all frogs are green. There are brilliant, colorful species in every color of the rainbow.

A frog completely sheds its skin about once a week.
