

Weather

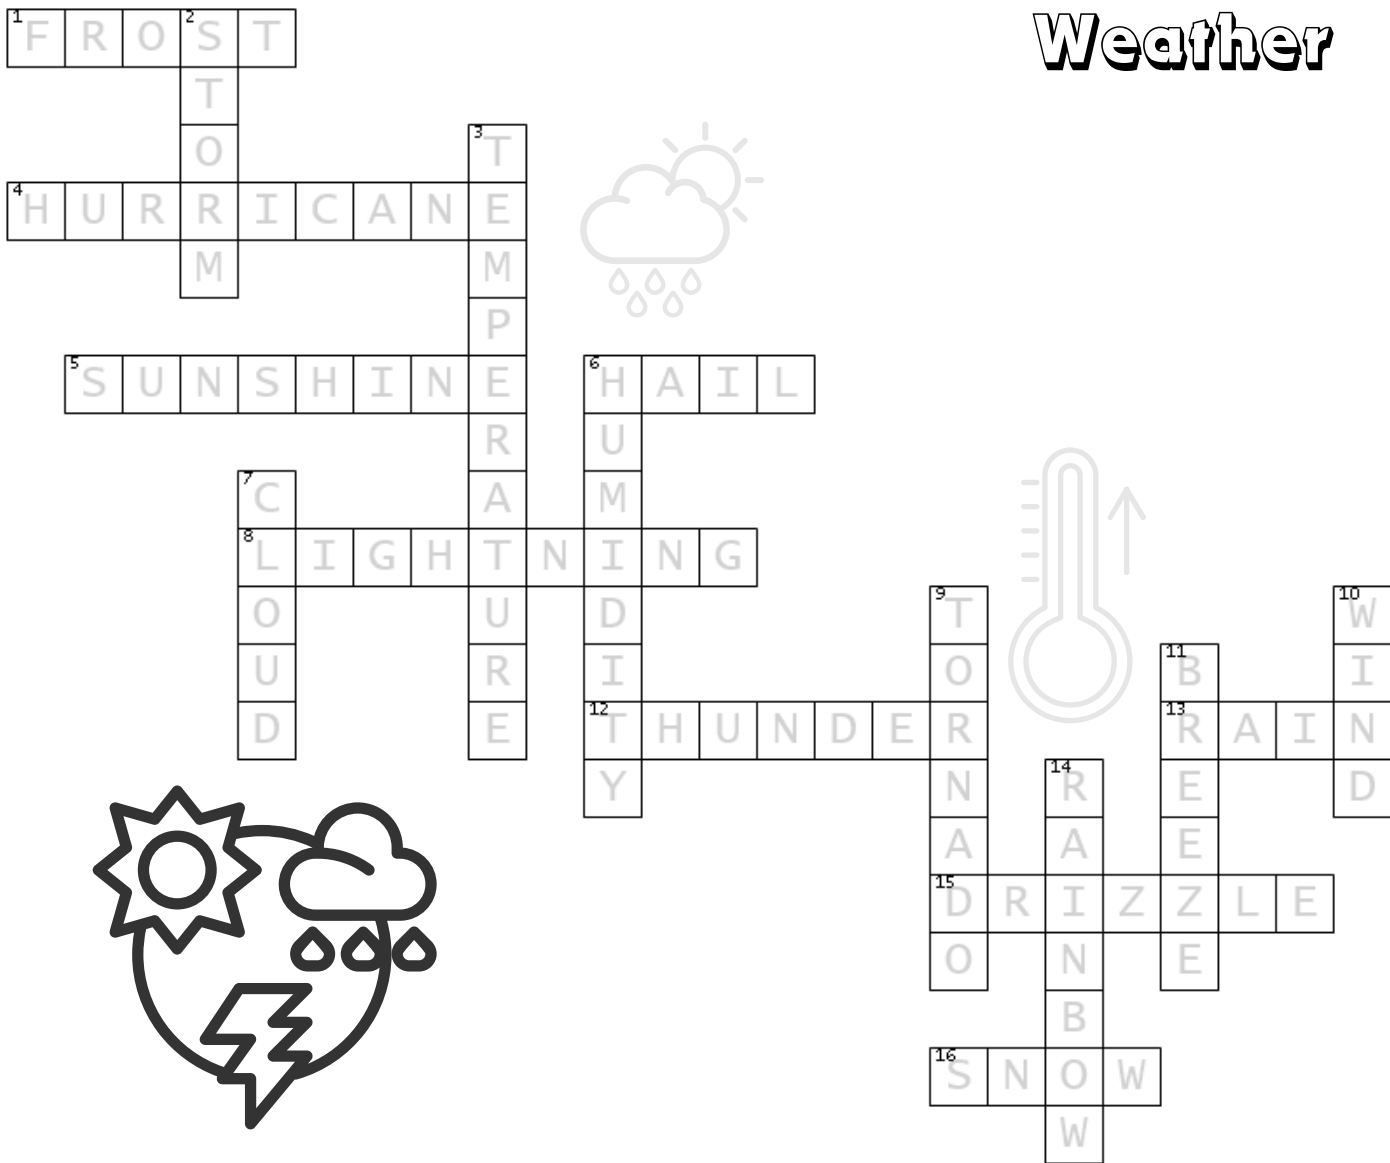

ACROSS

1. A thin layer of ice that forms on surfaces when it's very cold.
4. A powerful storm with heavy rain and strong winds, typically over the ocean.
5. Bright light and warmth from the sun.
6. Small balls of ice that fall from the sky during some storms.
8. A flash of light in the sky caused by electricity during a storm.
12. The loud sound that follows a lightning strike during a storm.
13. Water that falls from clouds in droplets.
15. Light rain falling in very small droplets.
16. Soft white flakes of frozen water that fall in cold weather.

DOWN

2. A violent disturbance in the atmosphere, often with strong winds and rain.
3. A measure of how hot or cold the air is.
6. The amount of moisture in the air.
7. A white or gray mass of water vapor floating in the sky.
9. A violent, spinning column of air that touches both the ground and clouds.
10. Air moving quickly from one place to another.
11. A gentle, light wind.
14. A colorful arc that appears in the sky when sunlight shines through rain.
