

# Periodic Elements

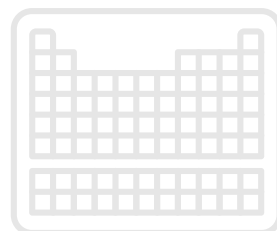

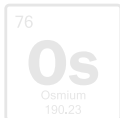

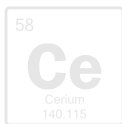

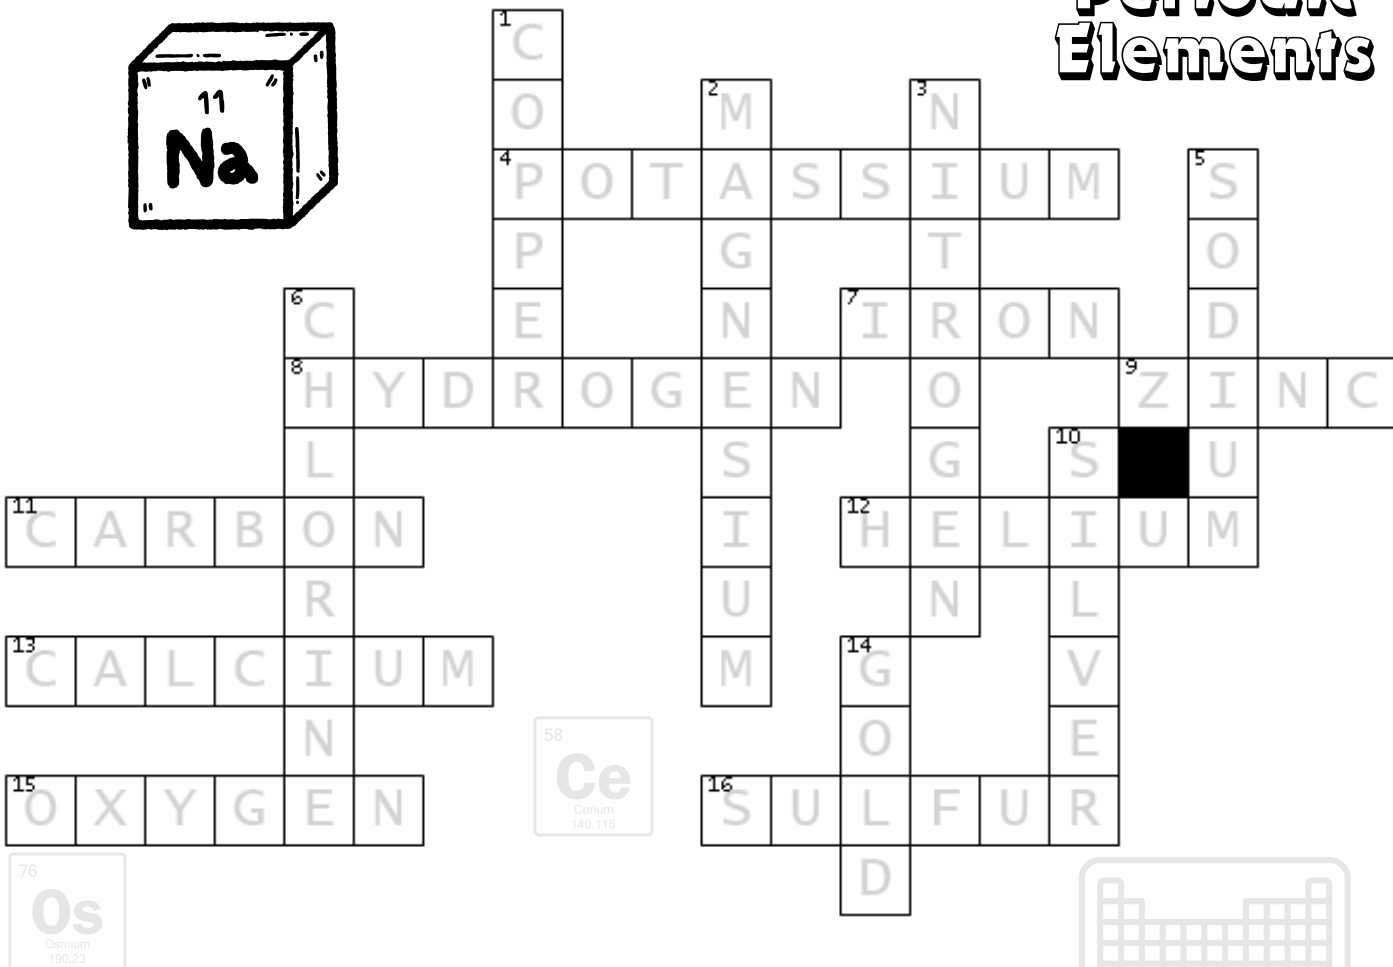

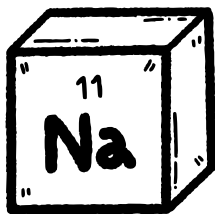

## ACROSS

- Essential element for plant growth and health.
- Metal used in construction and making steel.
- Lightest and most abundant element in the universe.
- Metal used in galvanizing and as an essential nutrient.
- Essential element found in all living things.
- Noble gas used in balloons.
- Element important for bone health.
- Gas necessary for respiration.
- Nonmetal used in fertilizers and sulfuric acid.

## DOWN

- Metal known for its electrical conductivity.
- Metal used in fireworks and as a dietary supplement.
- Makes up most of Earth's atmosphere.
- Soft, reactive metal found in table salt.
- Element used in disinfectants and bleach.
- Precious metal used in jewelry and coins.
- Precious metal with the symbol Au.

# Periodic Elements

## ACROSS

4. Essential element for plant growth and health.
7. Metal used in construction and making steel.
8. Lightest and most abundant element in the universe.
9. Metal used in galvanizing and as an essential nutrient.
11. Essential element found in all living things.
12. Noble gas used in balloons.
13. Element important for bone health.
15. Gas necessary for respiration.
16. Nonmetal used in fertilizers and sulfuric acid.

## DOWN

1. Metal known for its electrical conductivity.
2. Metal used in fireworks and as a dietary supplement.
3. Makes up most of Earth's atmosphere.
5. Soft, reactive metal found in table salt.
6. Element used in disinfectants and bleach.
10. Precious metal used in jewelry and coins.
14. Precious metal with the symbol Au.
